

Quality Policy

At Eric Parry Architects, we aim to provide our clients with exemplary quality of service and deliver award-winning designs that align with their ambitions and requirements while adhering to relevant statutory and regulatory standards and requirements. In every project, the quality of design remains paramount and is measured by the achievement of design awards whilst meeting program and cost targets.

Our Quality Management System (QMS) is ISO 9001:2015 certified, underscoring our commitment to adhering to clear procedures and meticulous documentation of our work through an accessible system. The implementation, review, and continual enhancement of our QMS are overseen by our dedicated quality team. Additionally, every staff member bears the responsibility for implementing the QMS and upholding the quality of their work.

Clear communication and comprehensive training facilitate the effective implementation of our QMS throughout the organisation. We encourage a culture of open communication, information sharing, and continuous learning to foster an environment where every team member feels empowered to contribute to our collective commitment to quality excellence.

We are dedicated to continuous improvement with ongoing review, evaluation, and enhancement of our QMS processes and procedures. This is implemented by monitoring, measuring, and enhancing our quality objectives and ensures that our systems adapt to meet the evolving demands of our business and the industry.

This quality policy, established by the directors, undergoes regular audit during management review to ensure its ongoing relevance and effectiveness.
